Información / postulación	https://internacionalizacion.uniandes.edu.co/layout-siete/cooperaci%C3%B3n-para-la-investigaci%C3%B3n-redes-institucionales/research-phd-networking-jlu
Descripción general	Uniandes and JLU Giessen have collaborated for more than 50 years to establish an institutional partnership that has developed into an exceptional strategic bond. Together with other German and Colombian universities, JLU and Uniandes have initiated two centres of excellence, which have attracted international attention: The scientific and academic consortium “Corporation Center of Excellence in Marine Science (CEMarin)” and the “German-Colombian Peace Institute Instituto Colombo-Alemán para la Paz (CAPAZ)”. Past year, the two international networks “SDGnexus” and “ColombiaCONNECT” broadened the opportunities for interdisciplinary research projects. Today we invite you to be part of the longstanding, extraordinarily successful cooperation between Uniandes and JLU. If you are a professor, researcher, or PhD student at JLU Giessen or at Universidad de los Andes, and you are interested in meeting other researchers in related fields who are also interested in exploring opportunities for international collaboration, please register to this event with your contact information and interests. You can check the networking gallery here to find out who has already registered. We will contact you with more details on the scheduled virtual networking session November 18th, 2021 (10:00 COT / 16:00 CET). Please save the date and share with your colleagues this event for expanding your network and exploring collaboration opportunities.
Contacto en Uniandes para inquietudes	Dirección de Internacionalización / Camilo Villa (oiaresearch@uniandes.edu.co).
